

Application Guide:

- Suitable for interior or exterior use on **plastered or painted walls** that are properly prepared.
- Correct **surface preparation is critical** to ensure the proper performance of Weber Gamatex™. Follow instructions carefully.
- One 25 kg bucket of product covers **approximately 5 - 6 m² in a single coat** at 2.5 mm thickness.
- **Application** is best started **early in the morning** when it's cooler. Clean equipment with water **immediately** after use.
- The surface may be sealed with a suitable primer to enhance and protect the wall surface.

DARE to be BOLD

with Gamatex™!

with Gamatex™!

Effortless Style, Uniquely Textured Walls

Gamatex™ is a ready-to-use textured finishing plaster that is applied with a trowel, making it easy to create stylish walls. **Available in 8 colours**, it's designed to give your walls a unique grooved finish.

How to apply Gamatex™?

STEP 1: Prepare the Surface
Ensure the surface is levelled, clean and dry.

STEP 2: Mix It Up
Mix the product in a bucket — there is no need to add water.

STEP 3: Apply the Plaster
Apply Weber Gamatex™ with a steel trowel.

STEP 4: Time to Style
Float the surface with a plastic trowel to create vertical or random patterns.

Drying time (dependent on weather conditions):

- Touch dry in **2 hours**.
- Hard dry in **12 hours**.

Curing time (before sealing, if required):

The surface may be sealed with a suitable primer to enhance and protect the wall surface. Let the surface cure for **7 days** for the best results, and you can **seal it after 12 hours** if needed.
