

Gyproc Range Charter

Gyproc has a longstanding reputation for innovation towards sustainability. Grounded in its efforts to reduce environmental impact across its entire value chain, Gyproc has consistently led the way in developing solutions that are better for people and better for the planet.

We're making it easy to build better. We're proud to announce that:

Gyproc is part of the **futuRE** Range:

A carefully curated range of locally manufactured, best-in-class products that adheres to strict sustainability, health, and wellbeing criteria.

For a product to form part of this range, it must adhere to the following criteria:

1. Each product must have an externally verified EPD.
2. The product must be locally manufactured.
3. The product must be manufactured in an ISO certified facility.
4. The product must contribute positively to at least one of the following criteria:

Better for the planet:

Better Resource Circularity.

Better Energy and Carbon Efficiency.

Better for people:

Better Health and Safety on Jobsites.

Better Health and Wellbeing Indoors.

How has Gyproc adhered to these Criteria?

We've obtained a third-party verified EPD.

Our products are locally manufactured in an ISO certified facility.

Energy and Carbon:

Reduced CO₂ Emission:

- RhinoBoard® 9 mm, RhinoBoard® 12.5 mm has a 15% carbon reduction as compared to the previous version.

Improved Resource Circularity:

Our Gypsum Boards up to 5% internally recycled content.

We've ensured our packaging is recyclable.

Our Gypsum Boards are Locally Manufactured to Reduce Emissions.

Health and Safety on Jobsites:

Easier and faster installation.

Lower dust on job sites.

Reduced builders' exposure to hazardous substances during installation.

Inert or non-hazardous waste is generated, making handling and disposal safer.

Gyproc Products in the futuRE Range:

RhinoBoard® 9 mm,
RhinoBoard® 12.5 mm
RhinoBoard® FireStop® 12.5mm
RhinoBoard® FireStop® 15mm

Health and Wellbeing Indoors:

Improved indoor air quality

- Gypsum-based products emit low levels of Volatile Organic Compounds (VOCs), improving indoor air quality.

Ensured Fire Safety

- Adherence to SANS 5301-1 and be certified as non-combustible with a minimum A2 rating

Ensured Acoustic Comfort

- RhinoBoard® 12.5 mm classic system – minimum 30dB
- RhinoBoard® FireStop 12.5 mm classic system – min 39dB

Being a part of the **futuRE** Range is a significant step for Gyproc, one that is aligned with our legacy and our future. As part of this innovative range, Gyproc stands as a trusted partner in building a more sustainable future for Africa, maintaining superior performance and ease of use. With the **futuRE** Range, we're ensuring that it's easy to choose better and build better.
